DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

in line 6; and

In line 7 "stabilized region" introduces new matter that is not supported by the Specification.

Allowable Subject Matter

3. Claims 2-6 and 8-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: Hollingsworth teaches depositing an amorphous silicon film, which has an exposed surface, on a substrate; illuminating the film with ultraviolet light, which would inherently form a light damaged region and a stabilized region; and etching the an unexposed surface on an amorphous silicon film. Applicant has presented persuasive

arguments to show that etching Fakaya's dangling bonds differs from etching a light damaged region, as claimed in the present invention.
